

E-SKATE

THE ELECTRIC SKATEBOARD

E-SKATE is in fact an electric skateboard. Thrill seekers will simply love this new way of getting about. Very easy to manoeuvre, E-SKATE offers the same sensations and behaves as a skateboard.

Exclusively at 

Off-road

NO ROAD NEEDED

E-SKATE is equipped with big knobby wheels and stabilizer springs. Because it absorbs vibrations, you will effortlessly get about on grass, earth and rough terrains. Riding long distances on a skateboard is now possible with E-SKATE.

Powerful engine

SPEED OF 32KM/H

E-SKATE offers the same sensations and behaves as a skateboard thanks to its powerful engine.

Once fully charged E-SKATE can cover from 8 to 20 kilometres. The distance varies according to the weight of the rider, the surface and incline of the terrain on which E-SKATE rides on and the cruising speed.

Ultra light cordless remote control

TOTAL CONTROL

Its pistol shaped remote control allows for a very natural variation in speed control. Three speed modes help you adjust the maximum speed of the E-SKATE. Its ABS brakes will generate stable and secure braking. Moreover, E-SKATE will automatically brake if the remote control is not close to the board (distance of approximately 3 meters).
